PROJECT

Topic: SAFETY BASED IOT SYSTEM USING SMART HELMET TO PREVENT ACCIDENTS.

The designed Smart helmet ensures the rider worn helmet or not and making it necessary to wear helmet, and also ensures that the rider has consumed alcohol and pulse rate more than the permissible limit. If any of these prime safety rules are violated, the proposed system will prevent the biker from starting the bike. The system also helps in efficient handling of the before and aftermath of accidents by sending a SMS with the location of the biker to the Emergency number. This ensures that the victims get proper and prompt medical attention, if he/she met with an accident.
